

AwesomeQA E-commerce – Final Test Report

1. Report ID

FR_AQA_002

2. Project Name

AwesomeQA – E-commerce Website Testing

3. Test Summary

End-to-end testing was conducted on the AwesomeQA e-commerce site. Focus was placed on user flows like registration, login, product browsing, cart management, checkout (as guest and registered), and logout. Positive and negative scenarios were covered.

4. Test Scope Summary

Modules tested include:

- User Registration and Login
- Product Listing and Filters
- Add to Cart and Cart Updates
- Guest and Registered Checkout
- Validation of field behaviour on errors
- Session handling after logout

5. Environment

- Browser: Chrome
- OS: Windows 11
- Tools Used: Excel

6. Test Execution Summary

Test Case Type	Total	Pass	Fail
----------------	-------	------	------

Positive	15	14	1
----------	----	----	---

Negative	14	14	0
----------	----	----	---

Total	29	28	1
-------	----	----	---

Failed Test Case :

- **TC_004 – Weak password registration**

Expected: Should display an error like "Password too weak"

Actual: Registration was allowed with weak password 1234

Status: Fail

7. Defects Summary

- No critical bugs were found.
- UI validations and field behaviour worked as expected.
- Cart and checkout flow were stable in both guest and registered user cases.

8. Conclusion

The AwesomeQA e-commerce application is functioning smoothly across all tested user flows. Both positive and negative cases passed. No major defects were identified. The application is stable from a functional perspective.
