VWO - Test Plan

1. Test Plan ID

TP_VWO_001

2. Project Name

VWO – Login & Registration Flow Testing

3. Objective

To validate the login and registration functionality of the VWO application, ensuring it accepts valid credentials, rejects invalid data, and handles negative scenarios gracefully.

4. Test Scope

- Validating login functionality
- Validating registration (sign-up) flow
- Testing negative cases (blank fields, invalid credentials, etc.)
- UI behaviour like "Remember Me", field validations

5. Features to be Tested

- Login with valid/invalid email-password combinations
- Email case sensitivity behaviour
- Input field validation
- "Remember Me" functionality
- Error messages
- Forgot Password functionality

6. Features Not to Be Tested

- Backend API responses
- Email delivery (in Forgot Password flow)

7. Test Deliverables

- Test Case Document
- Final Test Report

8. Test Environment

- Browser: Google Chrome
- OS: Windows 11

- Tools Used: Excel for test case documentation

9. Entry Criteria

- Application is accessible

- Basic flow understanding of the application

10. Exit Criteria

- All test cases executed

- All major/critical bugs logged and reported

- Functional flow validated as per requirements
